

Nathan Childress

About

I am an Entrepreneur with a development background seeking an opportunity to apply my experience to software products. I faced problems with bad business models, tightening market space, undefined org structure and poor GTM. Learning to assess situations and correct mistakes, pivot products and re-focus strategy I've successfully run the company at a profit for ten years. Now I would like to bring my experience and drive to a new company and team.

2 years University Of South Florida

Experience

Founder - CEO

10 years 2009-2020

nSource Services, Tampa, FL

- Created a marketing platform focused on the automotive retail industry. We created a single place the industry could gain insight on their target audience month over month by tracking all their marketing efforts across all channels.
- Grew company to 50 direct reports handling 2,800 direct and wholesale clients.
- Built sales team to launch B2B product. to sales of \$4MM in 12 months.
- Presented demos with executives in the automotive and advertising sectors.
- Planned comprehensive 1-6 month timelines + budgets for development with key milestones + requirements for launching features with development team.
- Based on feedback from clients, launched API and tools for clients to load their own data through the platform.
- Sought + Analyzed feedback from early adopters in order to improve upon UX.
- Created whitelabel price tier to wholesale clients based on analyzing customer needs and company financials to create a stable revenue stream with lower client churn.
- Developed lead ranking product. Product optimized queue to move the most customers through sales funnel. [Python, Twilio, .NET, SQL, IVR, CallRouting]
- Designed marketing materials and copy for customers and optimized for results with A/B testing.
